Soka Gakkai’s Human Revolution-Levi McLaughlin 2018-12-31 Soka Gakkai is Japan’s largest and most influential new religious organization: It claims more than 8 million Japanese households and close to 2 million members in 192 countries and territories. The religion is best known for its affiliated political party, Komeito (the Clean Government Party), which comprises part of the ruling coalition in Japan’s National Diet, and it exerts considerable influence in education, media, finance, and other key areas. Levi McLaughlin’s comprehensive account of Soka Gakkai draws on nearly two decades of archival research and non-member fieldwork to account for its institutional development beyond Buddhism and suggest how we should understand the activities and dispositions of its adherents. McLaughlin explores the group’s Nichiren Buddhist origins and turns to insights from religion, political science, anthropology, and cultural studies to characterize Soka Gakkai as mimetic of the nation-state. Ethnographic vignettes combine with historical evidence to demonstrate ways Soka Gakkai’s twin Buddhist and modern humanist legacies inform the organization’s mimetic of the modern Japan in which the group took shape. To make this argument, McLaughlin analyzes Gakkai sources heretofore untreated in English-language scholarship; provides a close reading of the serial novel The Human Revolution, which serves the Gakkai as both history and de facto scripture; identifies ways episodes from members’ lives form new chapters in its growing canon; and contributes to discussions of religion and gender as he chronicles the lives of members who simultaneously reaffirm generational transmission of Gakkai devotion as they pose challenges for the organization’s future. Readers looking for analyses of the nation-state and strategies for understanding New Religions and modern Buddhism will find Soka Gakkai’s Human Revolution to be an especially thought-provoking study that offers widely applicable theoretical models.

**Waking the Buddha**-Clark Strand 2014-05-01 Is there more to Buddhism than sitting in silent meditation? Is modern Buddhism relevant to the problems of daily life? Does it empower individuals to transform their lives? Or has Buddhism become too detached, so still and quiet that the Buddha has fallen asleep? Waking the Buddha tells the story of the Soka Gakkai International, the largest, most dynamic Buddhist movement in the world today—and one that is waking up and shaking up Buddhism so it can truly work in ordinary people's lives. Drawing on his long personal experience as a Buddhist teacher, journalist, and editor, Clark Strand offers broad insight into how and why the Soka Gakkai, with its commitment to social justice and its egalitarian approach, has become a role model, not only for other schools of Buddhism, but for other religions as well. Readers will be inspired by the struggles and triumphs of the Soka Gakkai's three founding presidents—individuals who staked their lives on the teachings of the Lotus Sutra and the extraordinary power of those teachings to help people become happy.

single baby, born to save a world. Two ancient prophecies, both foretelling the extinction of a race. Two sides racing to their appointment with destiny. A leader of men, determined to outwit the foretelling of his doom, leads his people in a sickening massacre to secure the continuation of his race. A single man, troubled with nightmares and voices in dreams, worries for his sanity as his life crumbles around him. Alone and friendless, Vincent escapes to isolated freedom, the loneliness forcing him to succumb to the terrifying nightmares and finally, to listen to the voices in the dreams. Many worlds away across the aching void, Farra listens to the voices in her own dreams, and embarks upon a perilous journey to bring truth and justice to one troubled soul struggling to find a purpose. The child that is now a man must face his nemesis and end the tide of evil that laid waste his world as he took his first breath. The voices in the dreams lead them on a journey through space and time, from world to world in a desperate struggle for truth, justice, life.

Inside the Digital Revolution - Bridgette Wessels 2016-05-23 In this work, Bridgette Wessels offers a unique insight into the ways in which core public institutions and powerful organizations develop digital communications and services within the public realm. The book draws on her ethnographic research with the London Metropolitan Police Service during their engagement in an innovative project to improve communication with the public using digital technology. As one of the largest, most advanced and highly respected police services in the world, working in a socially, culturally and demographically complex city, the Metropolitan Police Service offers a highly revealing case study of technology and the human processes which it is designed to serve. The ethnographic research is used to develop a new theoretical and conceptual framework for understanding the relationship between social action and technological change, addressing the way in which technology is socially shaped and culturally informed. The book also discusses the role of ethnography as a tool for researching complex multi-perspective, multi-sited networks of the innovation of digital technologies as forms of communication in late modern western society.

Rethinking the Human Revolution - Katie Boyle 2007 Arising from a conference Rethinking the Human Revolution reconsiders all of the central issues in modern human behavioural, cognitive, biological and demographic origins in the light of new information and new theoretical perspectives which have emerged over the past twenty years of intensive research in this field. The 34 papers cover topics ranging from the DNA and skeletal evidence for modern human origins in Africa, through the archaeological evidence for the emergence of distinctively 'modern' patterns of human behaviour and cognition, to the various lines of evidence for the geographical dispersal patterns of biologically and behaviourally modern populations from their African origins throughout Asia, Australasia and Europe, over the past 60,000 years.

Lightning Girl-www.superconnectedseries.com 2014-07-13 Heaven and Hell have spent millennia anticipating the arrival of the Envoy, the savior of prophecy who is said to unite the dimensions. In a chance meeting, a young girl named Stephanie with mysterious control over static electricity becomes enamored with Kyan, a sweet, if unremarkable, little boy. After Stephanie exposes her secret to the world in an attempt to draw out others with unexplained abilities, an accident reveals that Kyan is anything but ordinary. Putting everything on the line, Stephanie attempts to lead a group of gifted teens into a battle that could destroy their world. Does her devotion to the child have anything to do with his attractive older brother Keith and are all her actions just playing into the hands of the enigmatic Eric? Where have all these strange powers come from and why does Eric say that death isn't the end?

Storiology-Steven Dunham 2013-11-12 Once I realized that each moment in real life is more dramatic than any novel or screenplay ever written, I finally realized that reality was worth engaging. So often we wonder if anyone notices the lives we lead, but I believe God travels great distances to gather angels who long to see our stories unfold. He is like a director or writer who wants to show off his cast and characters. God, scripture, and truth stand firm, yet our stories and theology influence one another. What do you believe about God, Christ, and our identity as Christians? What are your thoughts on communion, worship, baptism, and heaven? What does God say about our struggle with Him and the emotions we carry inside us? What is the role of the church and the need we have for outside support? And finally, what are the true definitions of repentance and sanctification within the context of a grace-based theology? In your hands, you hold the intersection of my story and my theology. You hold my "Storiology". May it point you to God, igniting a desire to find Him in the middle of your own dramatic, valuable story. Even angels long to look into these things. - 1 Peter 1:12

Lessons for the Watoto Book 1-Angela Freeman 2014-01-12 "A wise man who knows proverbs, reconciles difficulties." ~ Afrikan Proverb Afrikan Proverbs teach important life lessons in just a few simple words. Proverbs can be found in every corner of the Afrikan diaspora. Our ancient traditions use these proverbs to teach our children culture, etiquette, and life lessons. These phrases are based on observing nature and using common sense. This makes most proverbs very easy to understand. Parents don't need to lecture children when we know how to use proverbs as teaching tools. Once again, Angela Freeman gives us a wonderful starting point to inspire our children to fully embrace Afrikan cultural norms of decency, respect, and wisdom. Ase'

The First Global Revolution-Alexander King 1992

Tanzania's Human Revolution-James N. Karioki 1979 In Tanzania, this book argues, the centrality of mankind is not a mere abstract ideal; it is embedded in the philosophy, policies, and programs of the nation. A major role of Tanzania's political leaders, especially Julius Nyerere, is to guarantee that the society and the state maintain a humane commitment. Tanzania's Human Revolution concludes that developments in this young African nation whether social, political, or economic--are understandable only in the context of its value system. The author thus takes issue with previous
studies, particularly those focusing on mechanics and processes while overlooking a pervasive humanism. Tanzania's brand of democratic socialism emphasizes cooperative agricultural villages and mass education. Although foreign investments are permitted in Tanzania in a limited way, urbanization and heavy industry are discouraged until the achievement of Self-Reliance, the watchword of the country's one party, the Tanganyika African National Union. Schooling combines the practical with the liberal, and graduates of colleges or terminal secondary schools are required to work for two years in the rural areas. Political decisions often benefit from village and neighborhood deliberations before becoming regional and national policies. Tanzanian citizenship is open to all races, and both English and Kiswahili are official languages. About one-third of the population is Christian, the rest espousing either Islam or one of the indigenous religions. Nyerere epitomizes Tanzania's heterogeneity; the son of a tribal chief, he holds an Edinburgh MA, is a converted Roman Catholic, and takes pride in being a lifelong patriot. By its steadfast opposition to all forms of inhumanity including racism—together with its correct yet independent relations with all other countries including the United States and China—Tanzania has become a moral force in Africa and the world.

Philosophy and Human Revolution 2018-12-13 This book collects a series of philosophical papers dedicated to the figure and work of Daisaku Ikeda. The author's interest in studying Ikeda's work is not to carry out a specialised or disciplinary study of his Buddhist exegesis, or to offer a critical synthesis from the point of view of its basic doctrinal contents and references, nor to examine his creed and religious teaching. Beyond the fact that Ikeda's work has the double face of a construction founded on a Japanese philosophical-religious tradition with specific links to classical Chinese tradition, interfaced with the globe's most representative literary, scientific and speculative cultural products, it was developed according to an intercultural design strongly marked by western rationality and a spiritual-speculative-pragmatic approach to life and the world. Throughout this book, the author proposes an agnostic suspension in order to leave a place for philosophy and its argumentative constructions.

The Bibliography of Human Behavior Hiram Caton 1993 This bibliography centers on research on human behavior based on biological models, methodologies, or findings. Over 6,700 entries from journals, monographs, and books have been selected for inclusion in concert with a worldwide network of learned societies and scholars. The entries are organized alphabetically by author under twenty broad subject groupings. Access is aided by author and subject indexes. Since 1975 there has been an explosion of behavioral research. New disciplines have been created; numerous journals and professional associations have been established to service emerging interests. Disciplines of greater vintage have been altered by the growth of knowledge and by cross-fertilization with other behavioral disciplines. Social sciences previously remote from behavioral research have entered the orbit of behavioral science. This book is a comprehensive guide to human behavior research writing; as such it will be of great interest to sociobiologists, anthropologists, psychologists, and organizational behavior theorists.

Evolution and Ethics Philip Clayton 2004-08-04 Certain to engage scholars, students, and general readers alike, Evolution and Ethics offers a balanced, levelheaded, constructive approach to an often divisive debate.

The Environmental Rights Revolution David R. Boyd 2011-11-29 The right to a healthy environment has been the subject of extensive philosophical debates that revolve around the question: Should rights to
clean air, water, and soil be entrenched in law? David Boyd answers this by moving beyond theoretical debates to measure the practical effects of enshrining the right in constitutions. His pioneering analysis of 193 constitutions and the laws and court decisions of more than 100 nations in Europe, Latin America, Asia, and Africa reveals a positive correlation between constitutional protection and stronger environmental laws, smaller ecological footprints, superior environmental performance, and improved quality of life.
